PROFILE

Italian native speaker with a diploma in clarinet (110/110) and 13 years of professional experience across composition, performance and events. I began using AI to solve concrete production, review and organizational problems; that work evolved into designing and testing AI-assisted products with measurable quality checks, deterministic guardrails and human approval.

SELECTED AI-ASSISTED PROJECTS

AI Outreach CRM	Designed a multi-model workflow combining web retrieval, personalized drafting, independent Claude/Codex review, citation checks and human approval. Built with Next.js, TypeScript, Supabase and Vercel.
Interpelli Watcher	Created a fail-closed document automation workflow using official sources, XML/PDF extraction, OCR, eligibility rules and dual-model approval. Validated with 83 deterministic tests.
MailPilot	Built an Electron email client with persistent IMAP sync, CRM enrichment, AI-generated editable drafts, provider fallback and explicit approval before sending.
Suno MIDI Extractor	Developed an audio-to-MIDI desktop pipeline using PyTorch-based transcription, FFmpeg, deduplication and experimental sustain-pedal reconstruction.

CAPABILITIES

AI & quality LLM evaluation · Prompt design · Structured outputs · Retrieval grounding · Hallucination checks · Safety review · Human-in-the-loop workflows · Test design	Technical exposure ChatGPT · Claude · Codex · Gemini · Next.js · TypeScript · Python · Electron · Supabase · Vercel · Git/GitHub · IMAP/SMTP

LANGUAGES & PROFESSIONAL BACKGROUND

Languages Italian: native English: advanced comprehension, intermediate spoken communication	Professional background Independent composer, clarinetist and saxophonist. Creative production experience sharpened my ability to translate ambiguous requirements into structured, testable workflows and clear deliverables.
---	---

Development approach: AI-assisted implementation with direct ownership of requirements, workflow design, testing, debugging and final quality decisions.
